

Impact of approximate misalignment corrections on  $\langle |B| \rangle$  vs  $x$  plots:  
 Grey is rescaled consol model, red is data from 4/05

No corrections

Approximate correction  
to offset in  $B_y$  vs  $x$  data

Approximate correction  
to offset in  $B_y$  vs  $x$  data  
AND approximate  
correction to slope in  $B_z$   
vs  $x$  data

Field component plots for reference:
